

How to order Shrink Sleeve Samples

1. Measure the diameter at the **widest part** of your bottle the shrink sleeve is going to cover in millimeters (mm).

2. Email sales@getpacked.com.au with the **exact diameter and your full name and address**. We will confirm via email the sleeve size we are sending you as a sample to test yourself.

3. When you receive the sample, make sure you are happy that the sleeve fits on easily.

Now you need to work out the length or height you require which is approximately 3-5mm above the top of the bottle/lid and 3-5mm below the lid or lip of the bottle. This is the cut length for your sleeve. (See images below)

4. Reply to our original email sales@getpacked.com.au to confirm if you require perforations for easy opening, your required size and length as well as quantity so we can quote you and/or send you a pro-forma invoice to check and pay.
