Fill-Air Renewable Content Air Pillows

**NEW!**

Fill-Air 95% Recycled Content Air Pillows

# Protect what matters most.

SEE's new, eco-friendly range air pillows are designed to maintain the superior level of void fill performance that Fill-Air is known for, while reducing the environmental impact of packaging materials entering the waste stream.

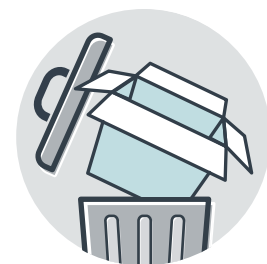

This means that your products and planet are protected, leaving customers and consumers happy.

Consumers care about their packages and the planet. According to SEE's 2021 Consumer E-commerce Sustainability Study:

Consumers expect their packages to arrive damage free.

Packaging Waste reduction is becoming more top of mind for consumers

Recyclability is the number one priority for E-commerce packaging.

SEE's eco-friendly range of air pillows can help you meet the ever-changing expectations of the modern consumer.

# Key Benefits & Features
